

Job offer for Working Student

Qoniac is a company that develops software solutions for manufacturing in advanced semiconductor factories around the world. Our products are used for automation and process control in high volume manufacturing and R&D and analyze measurement data in-line.

We are looking for a part-time working student, who will implement the redesign of a testing system of semiconductor factory environments.

We offer:

- A highly motivated team of software and semiconductor professionals working on challenging new products
- Agile software development
- A dynamic environment in a young, fast-growing company
- 1-2 days per week

We are looking for:

- A student with a background in computer sciences or electrical engineering
- Experience with Microsoft .NET 3.5/4.0 (C#)
- Good understanding of the English language is a plus
